About Us

Who We Are

ABS Marble Company stands as a beacon of excellence in the world of natural stone, renowned for its dedication to delivering premium marble, granite, and engineered stone solutions to an ever-growing clientele. With a legacy rooted in precision, artistry, and an uncompromising approach to quality, we have earned our reputation as one of the most trusted and innovative names in the industry.

Since our inception in 1997, we have passionately embraced the timeless elegance of natural stone, transforming raw slabs into stunning surfaces that define luxury, durability, and design brilliance. Our expertise spans across sourcing, cutting, polishing, and fabricating stone materials that not only meet global standards but also set new benchmarks in aesthetics and utility.

With an experienced team of professionals, state-of-the-art technology, and a customer-first philosophy, we proudly cater to a wide spectrum of clients—from architects and designers to contractors and homeowners—ensuring that each project we touch becomes a showcase of sophisticated craftsmanship and enduring beauty.

Driven by a vision to make natural stone an essential part of everyday architecture and interior design, ABS Marble Company continues to innovate, inspire, and shape spaces that leave a lasting impression—be it opulent residential villas, modern commercial complexes, or iconic public landmarks across the globe.

Our Vision

To be the most trusted and preferred marble supplier globally, known for our quality, integrity, and innovation.

Our Mission

- Deliver superior quality natural stone solutions.
- Empower clients with customized services and expert guidance.
- Embrace sustainable practices in sourcing and production.

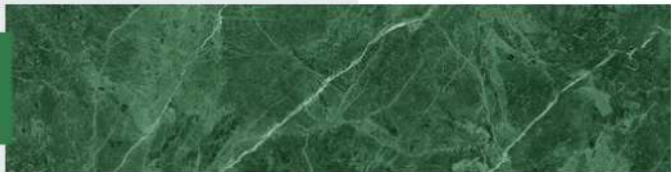

Our Products

Ronak Rocks Pvt. Ltd. is a professionally managed organization engaged in the production of a variety of stone products in various sizes and finishes. Our range of natural stones and natural building stones includes Granites, Marbles, Sandstone, Slate, Limestone, ONYX.

Granite

Granite is a natural stone that is formed from molten lava and primarily composed of quartz. Like marble & limestone, granite is quarried from mines.

Marble

Marble is a very hard stone that makes it easy to carve or sculpt. With progressive, fine sanding, it can also be polished to a very high finish.

Onyx

Commonly, specimens of onyx contain bands of white, tan, and brown. Unlike granite or marble, Onyx is also mentioned in the Bible at various points.

Quartz

Quartz Stone tiles are a man-made conglomerate produced by combining a mix of natural quartz stones, resin, crushed mirror flecks, and colour pigment. Unlike Ceramic & Porcelain tiles, Quartz is manufactured in large slabs, calibrated and polished. The slabs are then graded and cut into the individual tile sizes.

Agate

Natural agate is a glassy, colourless, variety of microcrystalline quartz. The agate gemstone is used as a semiprecious stone when it is of appealing colour and quality.

Kota Stone

Kota stone gets its name from the Kota region in Rajasthan, which is where it originates from. Made of fine-grained limestone, this sedimentary rock is hard and compact and homogenous in cross section.

Sand Stone

Sandstone tile is known for its characteristic grainy and porous texture and tactile appeal. Sandstone evokes a barren, wind-swept landscape, with swirling colors of gold, red, yellow sandstone tile and worn ivory sandstone tile.

Slate Stone

Slate is a fine-grained, foliated, homogeneous, metamorphic rock. Slate can be made into roofing slates, also called roofing shingles. Slate tiles are often used for interior and exterior flooring or wall cladding. Tiles are installed and set on mortar and grouted along the edges.

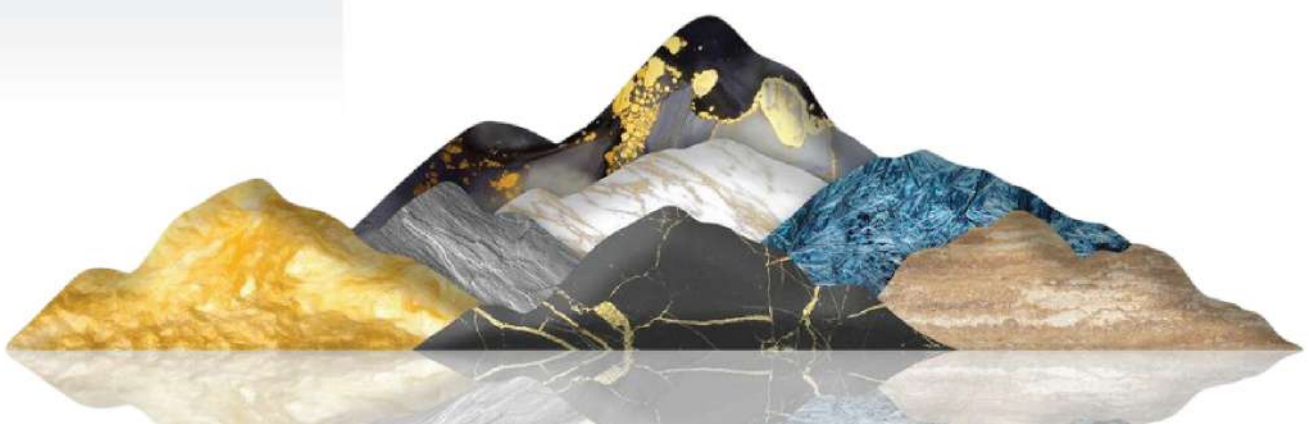

Veneers

Stone veneer is a thin layer of any stone used as decorative facing material that is not meant to be load bearing. Stone cladding is a stone veneer, or simulated stone, applied to a building or other structure made of a material other than

Mosaics

A mosaic is a pattern or image made of small regular or irregular pieces of colored stone, glass or ceramic, held in place by plaster/mortar, and covering a surface. Mosaics are often used as floor and wall decoration, and were particularly popular in the Ancient Roman world.

A modern interior scene featuring a staircase with thick, light-colored marble steps. The steps are set against a dark grey wall with vertical panels. In the foreground, a wooden sculpture with a complex, woven, hourglass-like structure sits on a square wooden base, which is placed on a marble step. Several thin, black, cylindrical pendant lights hang from the ceiling. The overall aesthetic is minimalist and contemporary.

A modern kitchen interior featuring a large island and a main countertop. Both the island and the main countertop are made of a dark, speckled granite with a 'Bronzed Brown' finish. The island has a thick, rectangular top. In the background, a main countertop features a black rectangular sink and a black faucet. The backsplash is made of the same granite material. Above the main countertop, there are dark, flat-panel upper cabinets. The lower cabinets are made of light-colored wood with vertical grain. The floor is covered in light-colored, rectangular tiles arranged in a herringbone pattern. The lighting is warm and focused on the countertop area.
